The application has been amended as follows:

(1) In the specification, the Abstract has been replaced by the following new Abstract.

-- A system and method for developing a software application for manipulating data associated with an asset are provided. The system includes at least one processing unit. The system further includes at least one memory store operatively connected to the processing unit. The system further includes an extensible N-tier software resident in and executable within the at least one processing unit, wherein N corresponds to a positive integer value. The system further includes an inventory of software components resident in the memory store wherein a plurality

of tiers are generated from the inventory of a software components using the N-tier software, each tier being associated with at least one other tier, and each tier comprising a plurality of software components and performing a predetermined function relating to an asset. --

In claim 5, line 32, after “assets”, a -- . -- has been inserted at the end of the last sentence.

REASON FOR ALLOWANCE

6. The following is an examiner’s statement of reason for allowance:

The cited prior art taken alone or in combination fail to teach, in combination with the other claimed limitations, a system for developing a software application for manipulating data associated with an asset comprising: an inventory of software components resident in the memory store wherein a plurality of tiers are generated from the inventory of software

Art Unit: 2122

components using the N-tier software, wherein N corresponds to a positive integer value; each tier being associated with at least one other tier, and each tier comprising a plurality of software components and performing a predetermined function relating to an asset, each software component comprising a software object, as recited in the independent claims 1, 5 and 11.

Conclusion

7. The prior art made or record and not relied upon is considered pertinent to applicant's disclosure.
